

# BRAZILIAN BREEDERS

## Higher Productivity in Poultry

Brazilian Breeders is a sector project led by the Brazilian Trade and Investment Promotion Agency (Apex-Brasil) and the Brazilian Association of Animal Protein (ABPA) to promote and support the exports of poultry genetics.

This project brings together the Breeding Companies and producers of fertile eggs and day-old-chicks from Brazil. Participating companies operate in the domestic and foreign markets.

**BrazilianBreeders**  
Higher Productivity in Poultry

Through special genetic programs, the companies deliver the best breeders to increase the results in poultry meat and egg production.

The Brazilian Breeders Companies house the great-grandparents, grandparents and parents to supply fertile eggs and day-old-chicks that are best suited to different markets.

The association between science and Brazil's climate, grains, water and

sanitary conditions, provides the best performance on the base of the chains of chicken and eggs production. Brazil has never registered cases of Avian Influenza and the last outbreak of Newcastle Disease was in 2006.

Brazilian Breeders Companies have extraordinary experience in logistics and deliver quality products all over the world.

## COUNTRIES THAT IMPORT BRAZILIAN GENETIC MATERIAL

IN 2018

### AFRICA

- Algeria
- Eswatini
- Ethiopia
- Ivory Coast
- Liberia
- Madagascar
- Mali
- Mozambique
- Senegal
- South Africa
- Sudan
- Zimbabwe

### AMERICAS

- Antigua and Barbuda
- Argentina
- Bahamas
- Bolívia
- Canada
- Chile
- Colombia
- Dominican Republic

- Ecuador
- Falkland Islands
- Mexico
- Panama
- Paraguay
- Peru
- United States
- Uruguay
- Venezuela

### ASIA

- China
- Hong Kong
- India
- Japan
- Pakistan
- Philippines
- Singapore
- South Korea
- Sri Lanka

### Non-EU EUROPE

- Norway
- Russia

### OCEANIA

- Marshall Islands
- Niue

### MIDDLE EAST

- Saudi Arabia
- Turkey
- United Arab Emirates
- Uruguay

### EUROPEAN UNION

- Belgium
- Cyprus
- Denmark
- France
- Germany
- Greece
- Italy
- Malta
- Netherlands
- Romania
- Spain
- United Kingdom

## BRAZILIAN STATES THAT EXPORT GENETIC MATERIAL

IN 2018
